Kocho

Managed XDR Rapid Protect

Redefine your security operations partnership, and turn risk anxiety into cyber confidence.

Cyber threats are evolving fast - AI-driven attacks, endless alerts, and a shortage of security talent leave teams constantly firefighting and struggling with alert fatigue.

Too often cybersecurity is seen as just another cost, with the severity misunderstood at board level, and with traditional providers not providing the visibility and control you want.

Nearly 40% of UK SMEs faced a cyberattack last year, with losses running into tens of thousands. But you don't need an eye-watering budget to get enterprise-grade protection.

Today's businesses demand clear, effective security that fits their budget - offering protection that turns risk into resilience and security into a true business advantage.

Your challenges:

- AI threats are evolving fast
- Existing providers don't give you the visibility you need
- Alert overload is costing you money - and slowing you down
- Skilled security talent is scarce
- Cyber risks are misunderstood by the board
- You want high-grade security that meets your budget constraints
- Your revenue and reputation are on the line

Our managed service is perfect for:

- Microsoft-first organisations looking to outsource SECOPs
- Organisations feeling unloved by their current provider
- Organisations worried about spiralling security costs
- Those wanting increased visibility and control over their security and data
- Countering AI-powered threats with AI-powered solutions
- Organisations that value clear communication, teamwork and transparency

Connect, Protect, Opitmise - Managed XDR Rapid Protect

Outsource your cyber worries to a real partner offering AI-assisted rapid protection. We pride ourselves on:

→ Exceptional customer service, clear communication, and transparency.

→ Real partnership; experts there with you when you need us most.

→ Unrivaled reporting on risks, costs, and security recommendations.

Our fully managed XDR security operations services use Microsoft's Sentinel and Defender solutions, alongside our own value added tools.

24hr AI-assisted onboarding

Fast, hassle-free deployment with Kocho Quickstart™ – Get your core Microsoft applications connected, ingested, and protected in just one day.

Stay tuned

We work in partnership with you on your needs and budget for constant tuning of log ingestion, giving you the best risk signals for your money.

24/7 AI-assisted XDR

Our expert-led 'AI-in-the-loop' approach ensures 24/7 protection. AI-assisted threat monitoring, triage, and incident response cuts your reaction times down from days to minutes.

AI-powered playbooks

Alongside a huge selection of 'out of the box' playbooks, our AI-powered tools automatically learn, create, and execute playbooks tailored to the threats we detect in your environment.

User centric phishing protection

Fight back against phishing attacks. Send suspicious emails straight to our SOC for monitoring and triage, power-up your organisations phishing awareness and training with gamified tools.

Unrivaled reporting

Unique ClearVue™ reporting dashboards offer complete threat visibility, risk prioritisation, and security advice. All in near real-time, supporting transparency and clear communication.

Native Teams integration

Critical alerts and notifications all happen where your work happens – real-time conversations with our analysts, faster context sharing, and quicker incident resolution, even on the move.

Dedicated Service Delivery Manager

Security is not just about tools, it's about people and process. With Kocho you get a go-to contact who oversees your onboarding and service quality.

Incident Response-ability

Our experts will support remotely and run any incidents you have from end to end and provide guided remediation where needed. Additional IR services can be added on request.

> The main reason for appointing Kocho was their proven experience and knowledge. Giving us a good feeling about the security service they could provide.

Raymond Goossens | Manager Network & Security Operations, Viking

viking

Get a unique view on incidents, risks and costs

ClearVue™ dashboards give you peace of mind and easy reporting, with near real-time security and threat insights across your entire IT estate.

ClearVue

Incidents

Reduce alert fatigue with summary reports by severity, classification and trend analysis.

Ingestion

Full transparency of costs, with focus on optimising spend. Identify underutilised Microsoft technology investments. Fine-tune log ingestion with detailed data ingestion stats.

Recommendations

We play back SecureScore, risky sign-ins, endpoint and software vulnerabilities, to provide you and your board with monthly security recommendations.

Included in our Managed XDR Rapid Protect service

24hr AI-assisted onboarding for core Microsoft apps and connectors	✓
24/7 expert (AI-in-the-loop) threat monitoring, triage and incident response	✓
