

Microsoft Entra Suite Workshop

Start your unified journey to identity governance, secure access, and compliance across cloud and on-premises environments.

Identity security is at the heart of modern Zero Trust strategies, with organisations facing complex challenges including fragmented identity governance, insecure remote access, and compliance gaps.

Over 80% of security breaches involve compromised identities, making robust identity and access management critical to reducing risk.

Microsoft Defense Report 2025

Kocho's Microsoft Entra Suite Workshop provides organisations with an actionable strategy and roadmap for implementing and adopting core technologies within Entra Suite.

Entra Suite Workshop Overview

Our Microsoft Entra Suite Workshop is a structured 4-day engagement designed to:

Introduce the full Entra Suite and its role in Zero Trust architecture.

Assess your current identity and access environment, including related third-party services.

Identify gaps and prioritise improvements.

Deliver actionable recommendations and a high-level roadmap.

The workshop combines discovery, technical analysis, and strategic planning to ensure your organisation is ready to deploy Entra Suite capabilities effectively, as well as to understand gaps in your environment and where non-Microsoft tools are currently providing some of the capability.

Workshop and engagement structure

This engagement is split into a 1-day face to face (or multi-session virtual) discovery and learning workshop, followed by 3 days for post workshop report and planning write-up.

At the end of the engagement we will deliver and playback a comprehensive report including gap analysis, prioritised recommendations, and roadmap.

Workshop topics and duration

STAGE	DURATION	FOCUS AREA
Entra Suite Overview	1 hour	Introduction to Entra Suite capabilities and Zero Trust alignment.
Establishing a Baseline	1.5 hours	Operational review of identity posture and compliance requirements.
Getting Started	1.5 hours	Cross-pillar strategy for identity governance and security.
Onboarding Your Workforce	1 hour	Verified ID, ID Governance, External ID, and ID Protection scenarios.
Enabling Remote Access	1 hour	Private Access for secure connectivity without VPN.
Govern Internet Access	1 hour	Internet Access for identity-centric Secure Web Gateway.

Key Deliverables

By the end of the engagement, you will receive:

- Technical and compliance gap analysis aligned to Zero Trust principles.
- Prioritised recommendations for identity governance and security improvements.
- High-level roadmap with timelines and budget estimates.
- Executive summary and stakeholder presentation.
- Training and change management guidance.

These deliverables equip your organisation to confidently plan and implement the respective Microsoft Entra features.

Ideal Stakeholders

To maximise the value from this engagement, we recommend involving:

- Identity and Access Management (IAM) team
- Roles responsible for Security Operations / Governance
- Roles responsible for application development
- Network Operations team
- IT Director / CISO / CIO

Become greater with Kocho
