Defend Against Threats with SIEM and XDR Workshop

Learn how to put next-generation Microsoft security tools to work for you, including a detailed threat health check and detailed report.

Do you know how many phishing attacks your organisation has received? If employees are using the right password protocol? Or whether personal data is being exposed?

In short, is your organisation's cloud environment as secure as you think it is?

Organisations today are managing a growing volume of data and alerts, while dealing with tight budgets and vulnerable legacy systems.

Get help achieving your broader security objectives—and identify current and real threats—with a Kocho Defend Against Threats with SIEM and XDR Workshop.

During the workshop we'll run a detailed threat health check spanning your entire cloud estate and provide a detailed report with recommendations.

You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Workshop highlights

Review your security goals and objectives.

Identify real threats in your cloud environment with a Threat Check.

Map identified threats to specific solution recommendations.

Showcase security scenarios with product demos.

Develop joint plans and next steps.

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward.

By attending this workshop, you can:

→ Identify current, ongoing security threats in your cloud environment.

→ Walk away with actionable next steps based on your specific needs and objectives.

→ Document your security strategy for the benefit of key stakeholders.

→ Better understand how to accelerate your security journey using the latest tools.

Workshop deliverables:

During this workshop, we'll partner with you to strengthen your organisation's approach to cybersecurity. We'll help you better understand how to prioritise and mitigate potential attacks, with:

→ Deep analysis of cyberattack threats that are found targeting your organisation.

→ Actionable recommendations to help immediately mitigate the identified threats.

→ A detailed assessment of your IT and security priorities and initiatives.

→ An inside look at Microsoft's holistic approach to security, and how it relates to your organisation.

→ Demonstrations of integrated security, including the latest tools and methods.

→ Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.

Who should attend:

The workshop is intended for security decision-makers such as:

→ Chief Information Security Officer (CISO)

→ Chief Information Officer (CIO)

→ Chief Security Officer (CSO)

→ Data Protection Officer

→ IT Security, IT Compliance, and/or IT Operations

→ Data Governance

Workshop delivery structure:

Pre-engagement call

Kick-off meeting

Cloud discovery log collection

Threat exploration

Threat results presentation

Engagement decommissioning
