# Securing your cloud transformation journey

→ David Guest

Solution Architect & Technology Evangelist

**Kocho**

BECOME GREATER

# Moving to the cloud

→ It is easy

→ Someone else can take case of security

→ It is all down to Microsoft / Google / Oracle / Amazon

# There is obviously no security issue here

# Seriously

→ Devices still need to be secure

    → After all they have access to your data

→ Data should be visible to the right people

    → Data is key – whether it is structured or not

→ Servers / Services / Platforms / Infrastructure

    → All are vital and should be protected

# Options

→ Endpoints

  → Defender for Endpoint

→ Data Flow

  → M365 Defender

  → DLP Policies

→ Compliance

  → GDPR & others

  → Document sensitivity

  → Monitoring and Reporting

# Comments

→ And Questions

# Thank you
