- Intune Suite overview
- Management updates
- Demos
- Mobile and connectivity
- Q&A

The world today

For 78% of organizations implementing a Zero Trust strategy, the investment represents less than 25% of their total cybersecurity budget.¹

Gartner predicts that 10% of large organizations will have a comprehensive, mature, and measurable Zero Trust program in place by 2026, up from less than 1% today. Organizations need to prepare.²

By 2025, the consumerisation of AI-enabled fraud will fundamentally change enterprise attack surfaces.³

1. Gartner, [Zero Trust Survey, November 2023](#)
2. Gartner, ["Predicts 2023: Zero Trust Moves Past Marketing Hype Into Reality." January 2023.](#)
3. Gartner, ["Predicts 2023: Cybersecurity Industry Focus on the Human Deal." February 2023.](#)

Today | Imperatives for IT and security teams

Protect data and access to corporate resources.

Adapt to evolving threats quickly

Manage app updates and vulnerabilities.

Gain complete visibility and control.

Keep overhead and costs down.

Govern compliance protocols

Cloud native is the definitive approach to modern endpoint management

Microsoft Intune

Cloud-native endpoint management enlightened by generative AI

Simplify and consolidate endpoint management

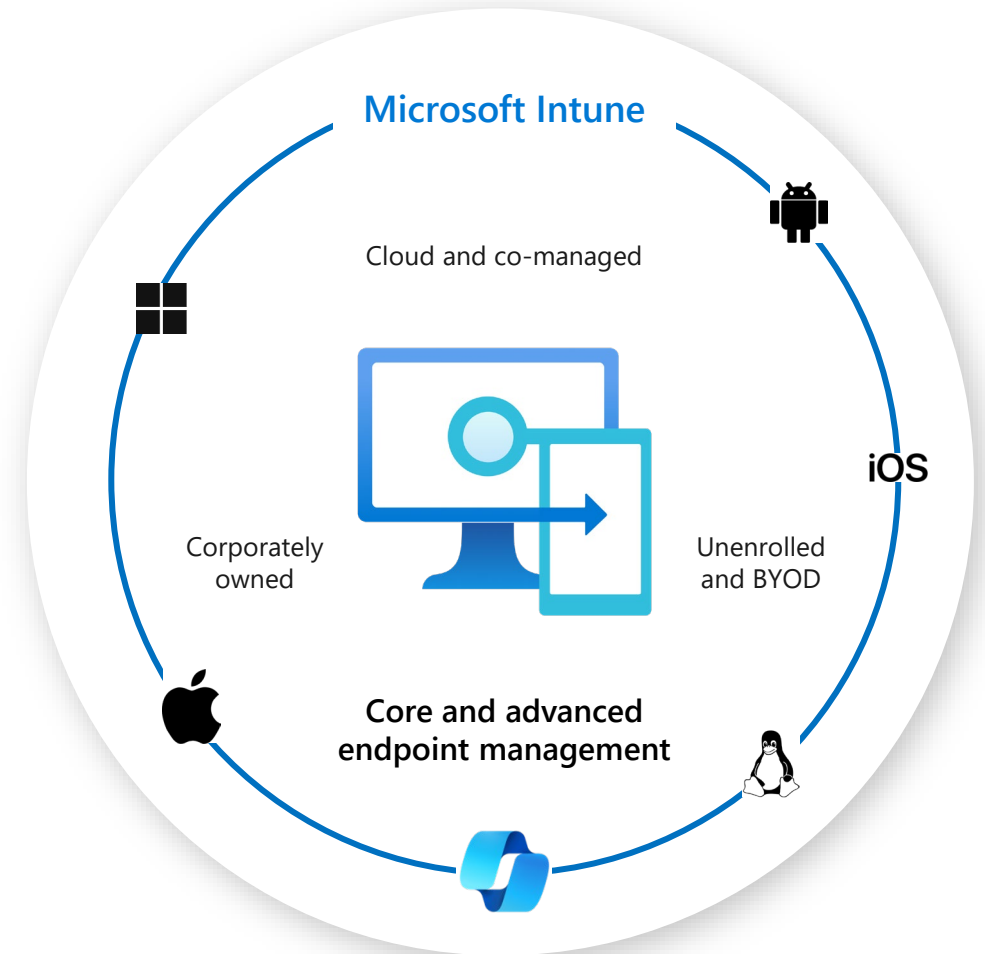

Cut cost and complexity by shifting to the cloud, unifying endpoint management and security tools in one place.

Fortify Zero Trust security

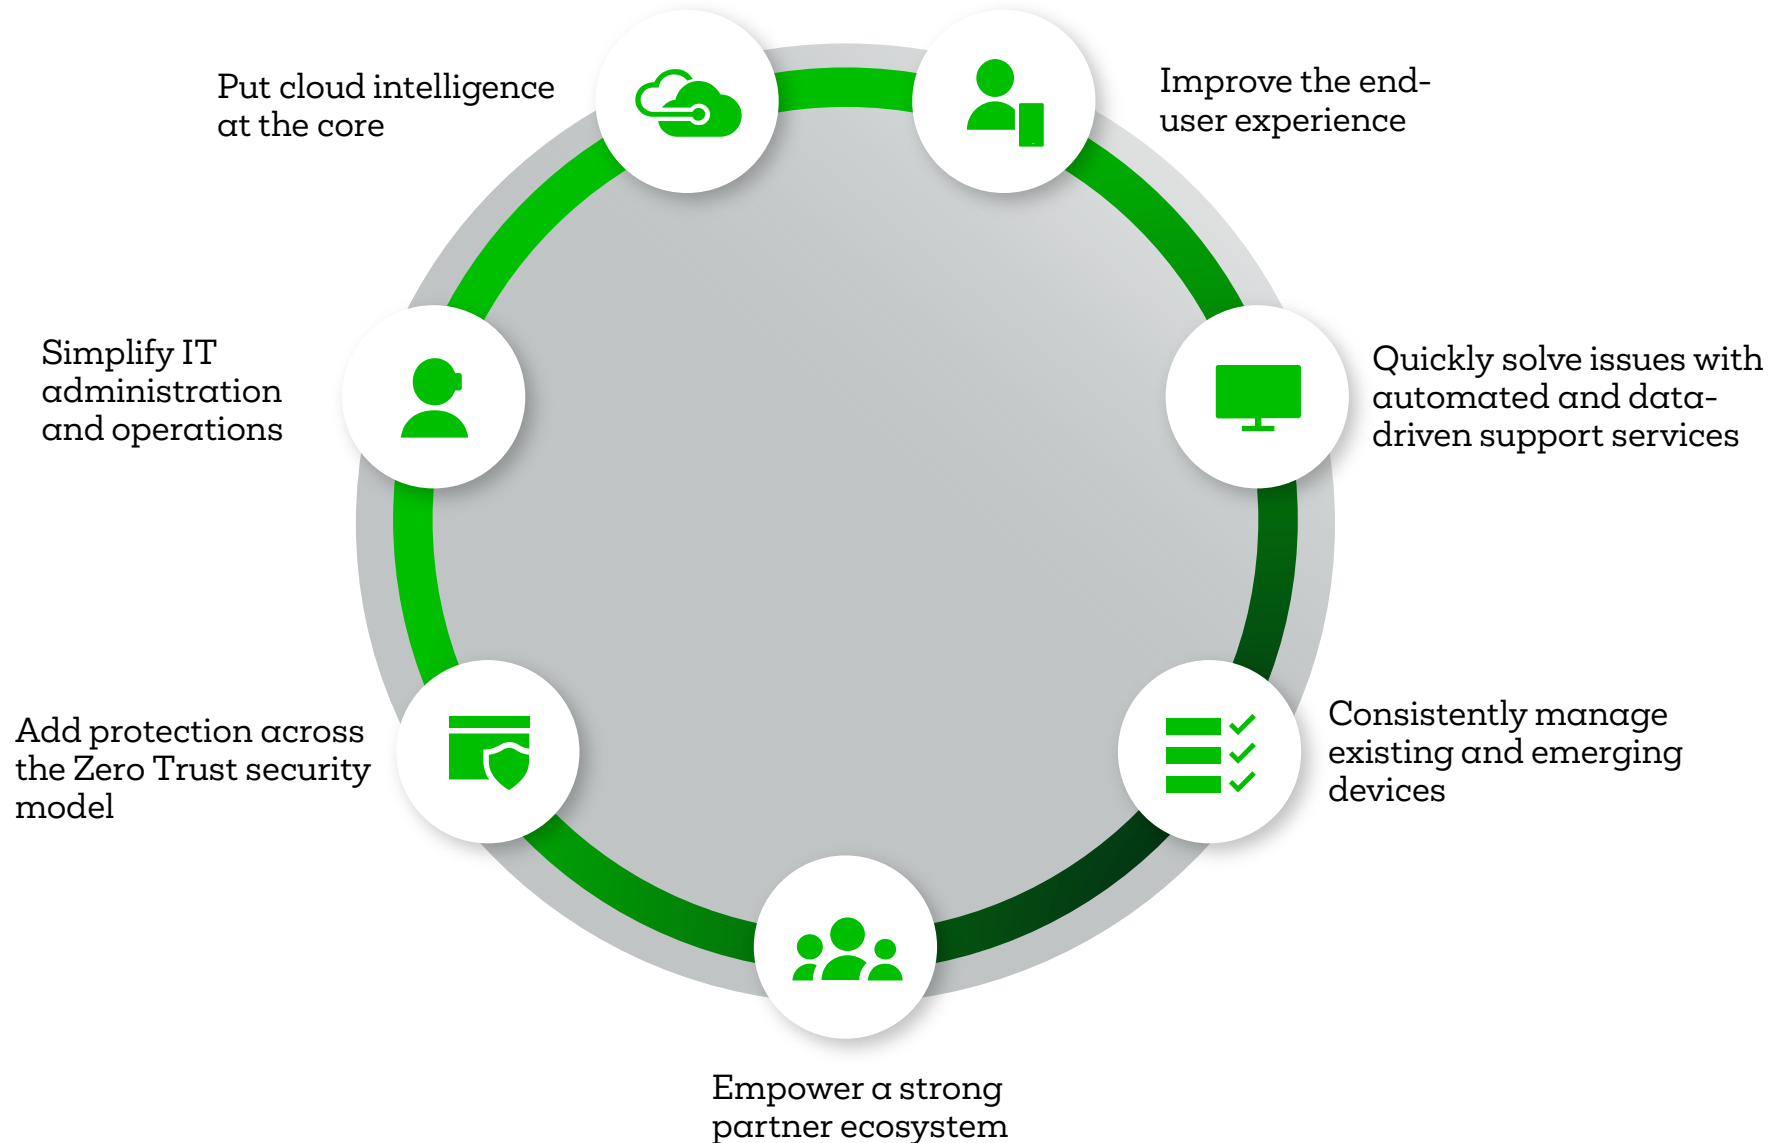

→ Mitigate threats and improve compliance across all devices by protecting users, devices, apps, and data.

Power better experiences

→ Proactively manage better user experiences while driving operational excellence with AI and automation.

What do we mean by cloud-native endpoint management?

Managing the modern environment

Unified Endpoint Management

Intune

- Cross-platform endpoint management
- Endpoint security built in
- Mobile application management
- Device compliance
- Endpoint analytics
- Shared device management

Intune Suite

- Remote Help
- Endpoint Privilege Management
- Advanced Analytics
- Enterprise Application Management
- Cloud PKI
- Tunnel for MAM
- Specialty devices and firmware updates

Security Copilot

Copilot in Intune

- Detect hidden patterns
- Troubleshoot & root cause mapping
- Act faster with AI insights
- Create recommended policies
- Report on security
- Strengthen IT expertise

Built on the integrated value of the Microsoft Cloud.

Microsoft Intune plans

Intune Plan 1

Included in EMS E3 or Microsoft 365 E3, ME5, F1, F3, and Business Premium plans

- Cross-platform endpoint management
- Endpoint security built in
- Endpoint analytics
- App protection policies
- Shared device management
- Device compliance
- Risk and app based conditional access
- Proactive remediation
- Integrated Microsoft 365 and security
- Device Inventory

**Also available as individual add-ons
aka.ms/IntuneSuitePricing*

Intune Suite

Add to Plan 1 to utilise these solutions*

- Remote Help
- Endpoint Privilege Management
- Advanced Analytics
- Enterprise Application Management
- Cloud PKI
- **All Intune Plan 2 features**

Prerequisite

- Intune Plan 1

Intune Plan 2

Add to Plan 1 to utilise these features

- Tunnel for Mobile App Management
- Mobile firmware update management
- Specialty device management
- Multiple managed accounts Teams/Outlook (future)

Prerequisite

- Intune Plan 1

Provision Security Compute Units (SCU) to run Security Copilot workloads.

Start now with a consumptive model, with no per user or per device charges

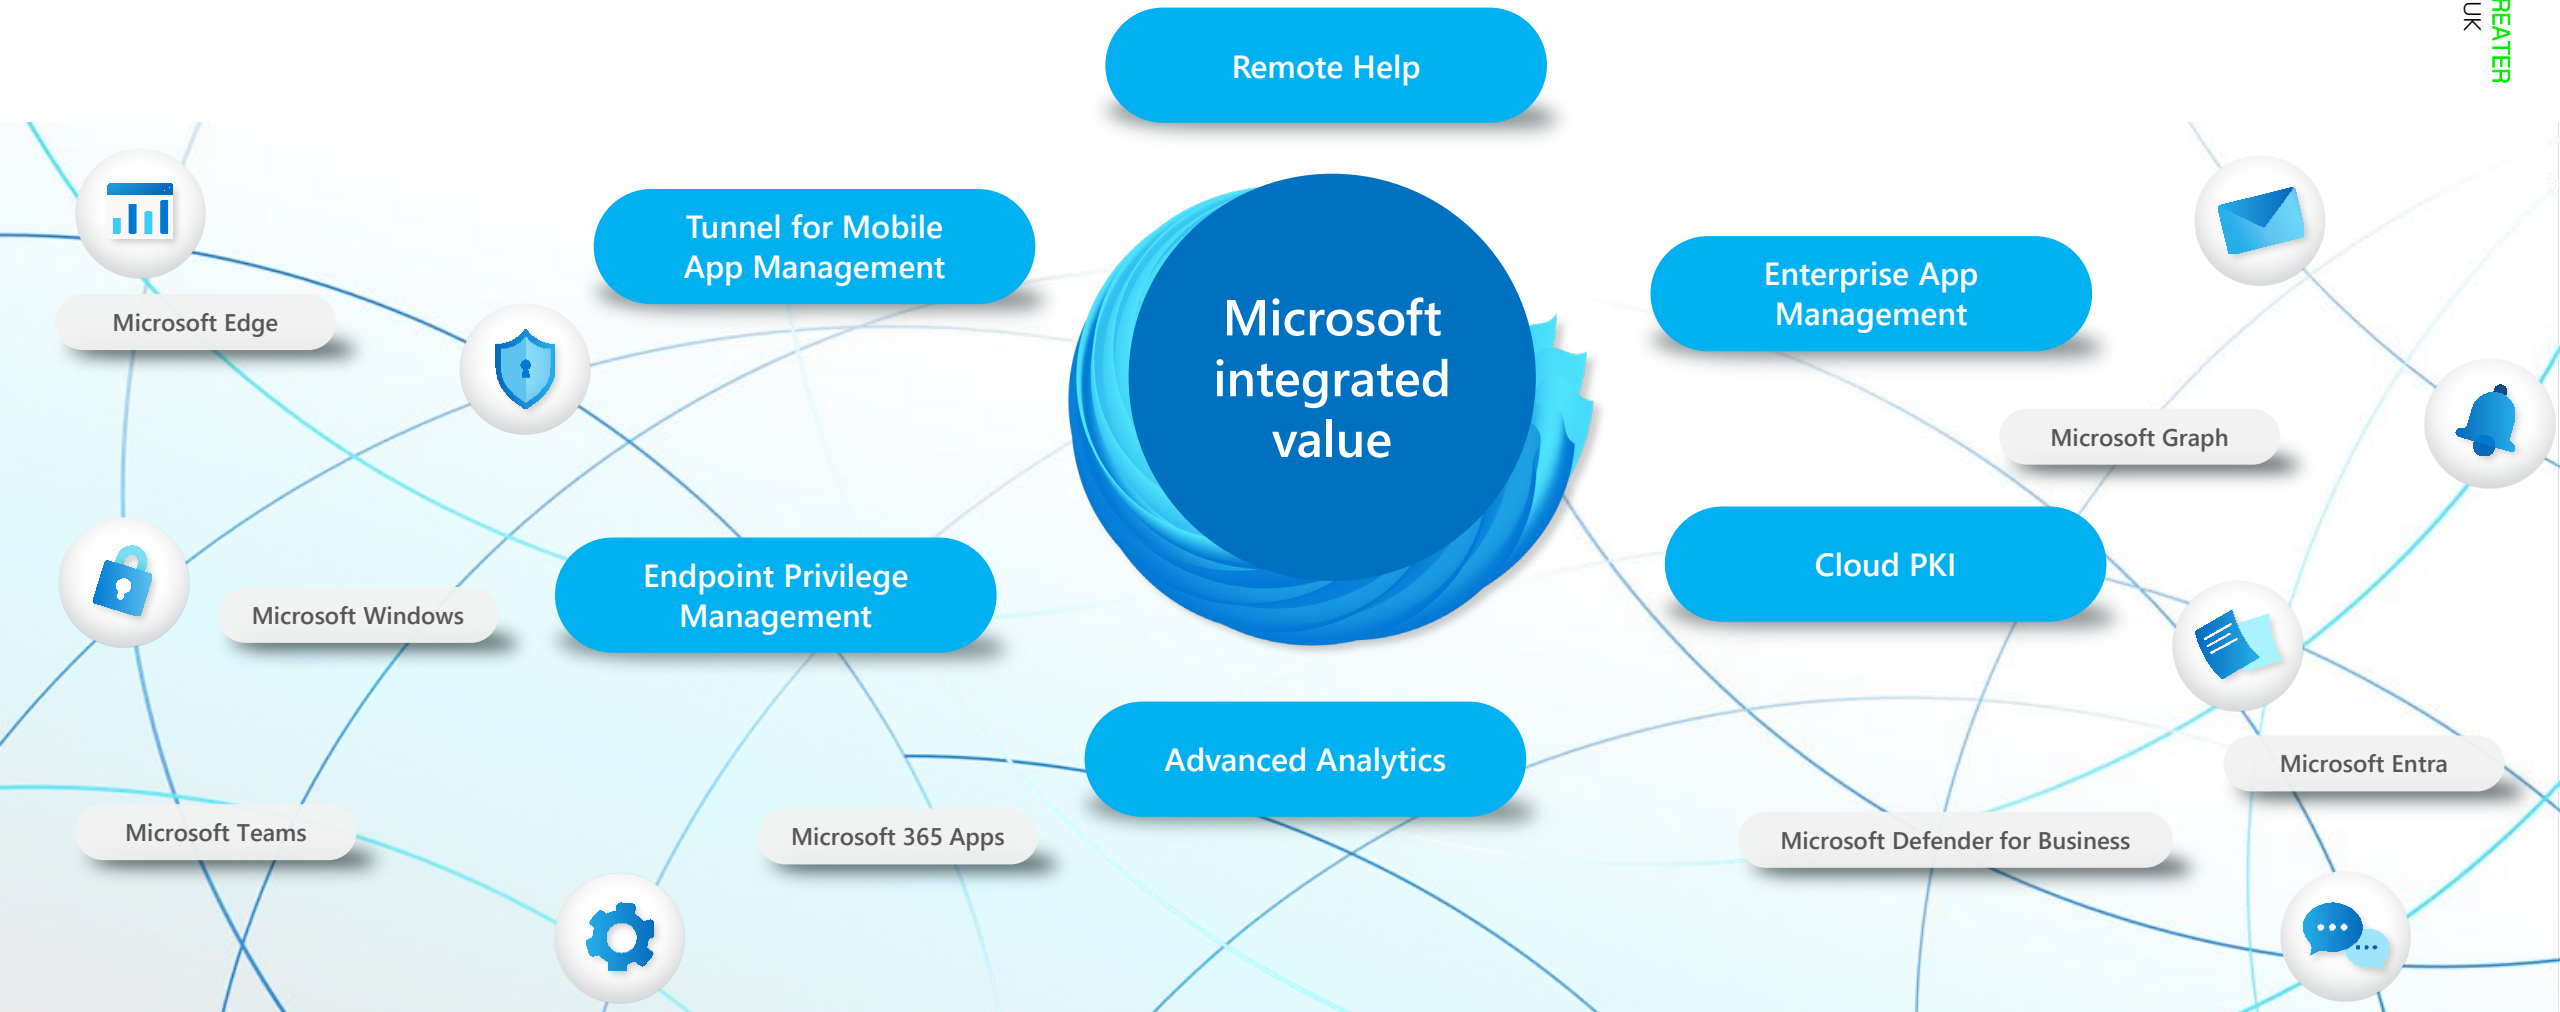

Provision Security Compute Units (SCU) to run all Security Copilot workloads

Easily manage costs with Security Copilot dashboards to monitor usage

Microsoft Intune Suite

Simplicity | Security | Savings

Linux management

Current functionality

- Ubuntu LTS support
- Custom Compliance scripts
- Custom Configuration scripts
- Standard compliance settings

Coming soon

- Red Hat support
- WSL support
- Troubleshooting capabilities for custom scripting

Home

macOS device management and protection

Delivering the best managed-Mac experience for cloud-native organizations

Supercharge productivity and provide secure experiences for your Mac users with platform SSO, declarative device management, and flexible application management.

Single sign-on for users to access device, Microsoft 365 apps

Simplify management, eliminate third-party solutions

Configure Secure Enclave, FileVault and Device attestation to improve security

20%

of worldwide desktops are operating with macOS.

Source: StatCounter, Desktop Operating System Marketshare WW, July 2023.

Remote Management

This Mac is owned by:

MELI-MELO DECOR

Remote management is required and will allow this organization to set up email and network accounts, install and configure apps, and manage the settings of this Mac. ⓘ

Back

Enroll

New and notable features

- **Enrollment time grouping** (Windows 11, Android) – Add devices to a security group during enrollment so that you're not waiting on dynamic membership updates. Speeds up delivery of assigned policy post-provision.
- **Windows LAPS changes** (Windows 11 version 24H2 and above) – The Intune LAPS policy in Account Protection will now automatically create the desired administrator account, so you won't have to rely on a separate custom CSP policy.
- **Propertiescatalog** (Windows 10, 11) – You can use Device inventory to collect and view more hardware properties from your managed devices to help you better understand the state of your devices and make business decisions.

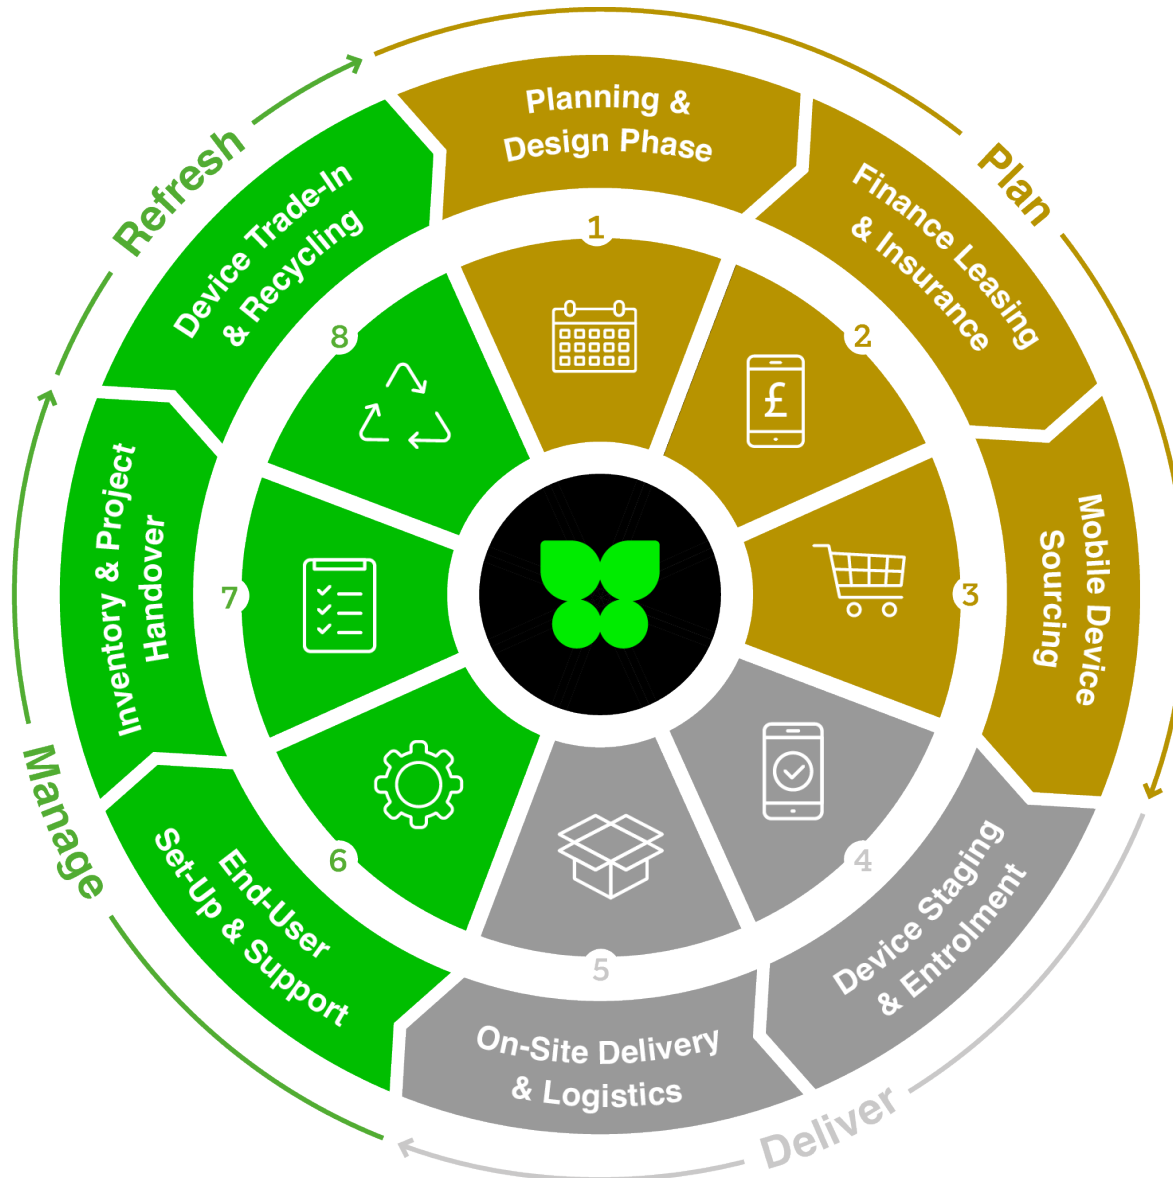

Demo

- Cloud PKI
- Enterprise App Catalog
- Properties catalog
- Policy best practice

Kocho Device Support

On-Demand Device Support

Our device team can provide on-demand support for bulk device orders and refresh projects:

- ✓ Smartphone, tablet and laptop sourcing
- ✓ Device enrolment, preparation & accessory kitting
- ✓ Shipping & Logistics (including end-user deliveries)
- ✓ Connectivity configuration
- ✓ Scheduled new device set-up calls for end-users
- ✓ Device inventory updates
- ✓ Old device data wipe, lease returns, resale and recycling

Improving Mobile Connectivity Management with eSIM

Head of Mobile Services

Overview

- What is an eSIM ?
- eSIM Use Cases
- eSIM Deployment (and MS Intune Update)
- Kocho SureSIM Overview
- SureSIM Demo

What is an eSIM?

SIM

eSIM (embedded SIM)

iSIM (Integrated SIM)

Digital embedded SIM card

(typically in smartphones, laptops, tablets, routers, IoT devices etc.)

- ✓ Removes the need for physical SIM cards – space saving – no SIM tray
- ✓ Can support multiple carrier SIM profiles – easy to switch services (iPhone supports 8 eSIMs)
- ✓ Improved security – fully encrypted & no physical SIM to remove / tamper with
- ✓ 'Over the Air' deployment and activation – push delivery in seconds
- ✓ More sustainable – no plastic waste
- ✓ Compatible with most iPhones and growing number of other smartphones

What are eSIM Services?

Most commonly known for Travel eSIM

- ✓ Highly cost effective in many countries
- ✓ Fixed cost – typically pre-paid
- ✓ No bill shock risk
- ✓ Compatible with most iPhones and growing number of other smartphones
- ✓ Consumer applications to support installation and eSIM usage

Corporate eSIM Technology Use Cases

Travel eSIM
(Roaming Savings)

Multi-Network Back-up

EID eSIM Installation

- ✓ Over the air deployment
- ✓ Auto-APN configuration
- ✓ Permanent implementation (where required)
- ✓ Pre-travel testing and user-set up (5 mins)
- ✓ Tailored configuration and allowances
- ✓ Optional content and policy controls

BECOME GREATER
KOCHO.CO.UK

Kocho's corporate back up data and travel eSIM provides 100% control over global data usage and charges:

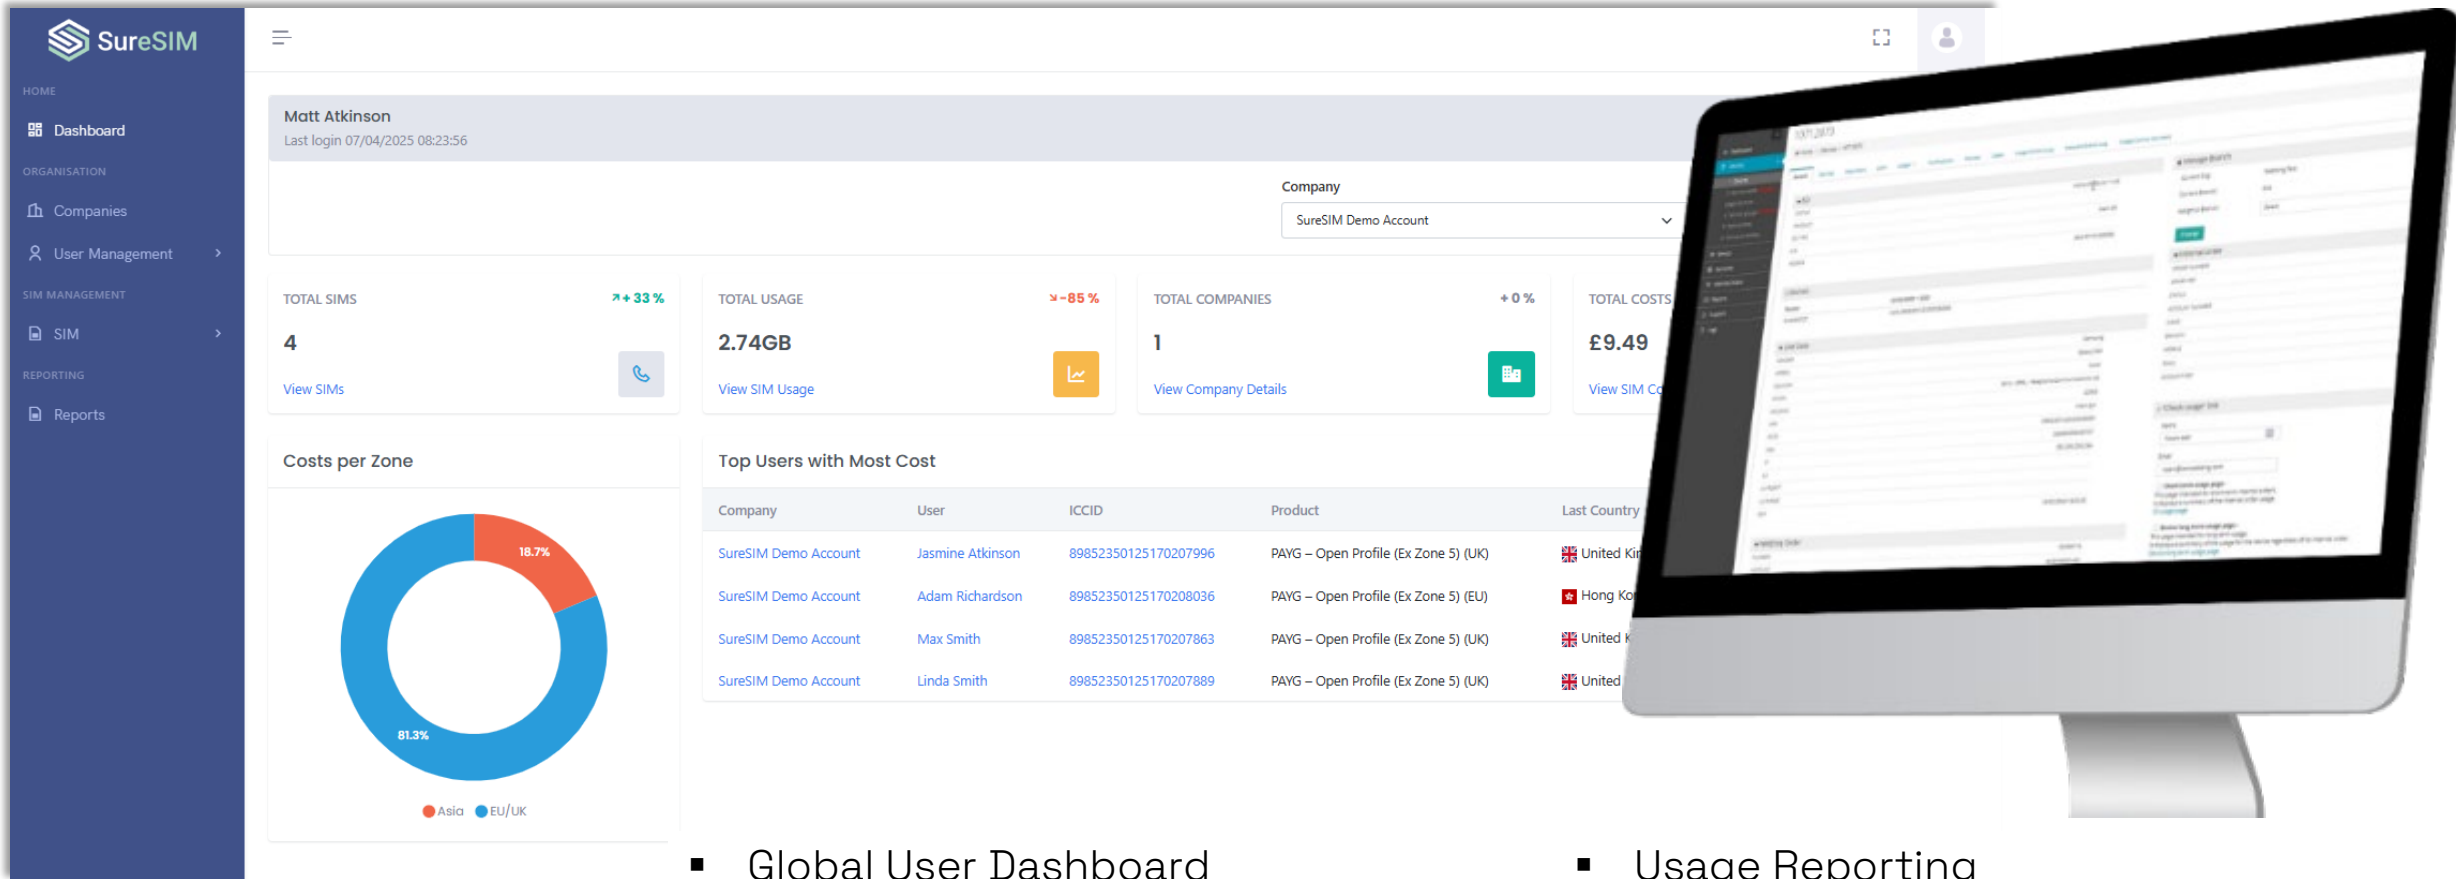

- \ Multi-Network UK Back Up (EE, O2, Vodafone, 3)
- \ Over The Air (OTA) eSIM Deployment
- \ Near Real-Time Usage Data & Billing
- \ Pre-Travel Testing & End-user Set-up
- \ Choice of Usage Policy Controls
- \ Low Cost Rental & Pay per MB Pricing
- \ Works in >200 Destinations
